

How do i screen mirror from my phone

Continue

Dealing with a broken screen on your phone is a troublesome thing. Sometimes, our phone accidentally falls on the ground, the screen gets some minor scratches on the screen, or it causes minor damage to the phone, or sometimes both happen at the same time. It becomes very difficult to make a call or open important documents during that time. However, you don't need to worry, in this article, we enlisted different methods on how to view broken phone screen on computer.The most effective and easy way to control your broken screen phone is the AirDroid Cast app. It is known for quick casting. This casting and mirroring application will help you to control and access your phone easily. The methods of casting broken screens are different for different devices like Android and iPhone have different options.1. Mirror Broken Android Screen to Computer with AirDroid CastIf your Android phone screen is broken but still shows some response, you can mirror your Android phone to PC easily in a short time. AirDroid Cast offers 2 different ways to use broken phones on PC. You can mirror your broken screen with these methods. It is important to note that this solution is only available for those phones that the screen cracks but the touch still can work. Note : To make sure you do the following steps smoothly. Please download AirDroid Cast on both your phone and PC first.WLAN ConnectionThis method is amazing by which you can remotely connect your broken screen Android phone to PC. Here is a step for casting an Android phone to PC wirelessly.Click download button in above or go to Google Play Store to install this app onto your phone and PC.Scan the QR code of PC with your Android phone AirDroid Cast or input 9 digit code which is displayed on your PC.A pop-up will appear on the screen for asking for permission; allow it and tap on start casting.Now you will see a notification on the PC for permission to allow the device to cast its screen on the computer.Enable the screencasting permission option, click on start now.You are done. Now you can access and control your AirDroid Cast screen on your PC.USB cableHow to cast broken phone screen on computer quickly? The quickest way to mirror your broken screen Android phone is the USB option of AirDroid Cast.First of all, get physical access to the PC you want to monitor your phone.You need to pick a USB cable and connect your phone with PC.Go to AirDroid Cast on PC, click on the USB option, select your device from available list, start casting.After a successful connection, you can see your broken Android screen on PC.2. Mirror broken iPhone Screen to Computer with AirDroid CastAirDroid Cast application presents three different options for mirroring broken iPhone screens to PC. Two methods are the same as we have discussed above for Android. Now let's introduce the last method - Airplay.This option only works for iPhone users. It is the best way to mirror phone with broken screen to PC. For casting via airplay mode, follow the below-mentioned steps.Download AirDroid Cast on broken screen iPhone and your PC.Open AirDroid Cast on PC, and make sure your server is working properly.Now connect both devices to the same Wi-Fi networks.Go to your iPhone, open a control center, and tap on the "Screen mirroring" option.Choose your AirDroid Cast - XXX and tap on start broadcast.Now your broken iPhone screen will be visible on your PC screen.3. Access Samsung Phone with Broken Screen via Samsung FlowSamsung is an Android phone which has the option to access your phone if its screen gets broken. The Samsung Flow helps to transfer your data easily..First of all, download Samsung Flow on Samsung phone and PC.Connect both devices with the same PC and Samsung phone to the same Wi-Fi.Pair the devices with each other, confirm the verification.Now you can access your Samsung phone and transfer any file.How to cast broken phone screen on computer without touch screen? If you have dropped your phone, you can still see everything on your screen, but the touchscreen is unable to work properly. Don't panic. We have a solution with which you can access your phone. For this, you require extra equipment. A USB mouse and a USB hub with an HDMI port.The first step is to check if your phone is unlocked or not. If your fingerprint or face code is unlocked, you can easily access your phone.If you have to access it by entering your password, then see the following steps.Connect one end of the USB cable to your phone and the other end to the USB hub.Now connect a USB mouse to a USB hub.With the help of a mouse, enter your password and unlock your mobile.After unlocking your phone, connect your USB hub to your personal computer.After that, a message on your mobile will appear in "file transfer mode". Click on that option to use the mouse, your phone is now connected to your computer. You can see all the files on your PC and save them.Sometimes you can't even see the screen of your phone after you have dropped it. This happens after severe physical trauma. Then how can you know whether your phone is working or not?If the phone is working, you can hear notification sounds and feel the vibration, and your touch screen is working. In this condition, you can get your data from your mobile. For this, you will need another phone. Connecting your phone to your charger. After charging, your phone will be turned on.Now take another Android phone, this should be the same model as yours.With the help of USB, connect your broken device to your computer.A message will appear on your screen showing "file transfer mode".Now, remember which part of the screen you pressed.Now connect your mobile phone to your computer with a USB cable.As your screen is broken and black, you won't be able to see anything, but as you have performed this before. You will be able to guess.After connecting it, you will hear a notification sound, now you can access all the files on your computer.Now you can fully control your phone, can transfer files and data to PC or other devices.If your phone fell down and both screen and touch are not working. It is worst-case because, in this case, you can't access or control your phone easily. But it is possible to connect your phone to the TV. You can access your black screen and no touch screen working phone by connecting it with the TV.Follow these steps:Pick a USB hub, connect it to your phone, select an HDMI cable, and connect one end to the TV and the other end to the mobile USB hub.Now connect the mouse and USB hub, turn on your smart TV, select HDMI input.Now you can Access your black screen no touch phone with your TV.If your phone got cracked and no screen and touch is working, you should replace your mobile screen because, in this way, you can save your precious data and preview this. If you replace your mobile screen, you may not access your mobile data. As you know, it is very painful when our mobile screen gets cracked and we can't use our phone anymore. But it becomes complicated when you have to deliver some important file to the boss or client and your phone screen and touch do not work correctly after falling. There are different methods to access your phone and share data to PC, but AirDroid Cast is the best application. It has multiple options connecting options for both Android and iPhone. Users can control their phones with its remote control feature. Amazon While Amazon Fire TV Sticks offer apps for popular streaming services on your TV, they also allow you to mirror your Android phone and tablet to a TV. Here's how to do it. Mirroring an Android screen using Amazon Fire TV works like casting using Google Chromecast and Apple's AirPlay. For this to work, the Android device and Fire TV need to be on the same Wi-Fi network. RELATED: What is Miracast and Why Should I Care? First, turn on the Amazon Fire TV. Press and hold down the "Home" button on the Fire TV Remote for three seconds. In the menu that appears, select "Mirroring." On Android, open the "Settings" app and select "Bluetooth & Device Connection." Select "Connection Preferences." Open the "Cast" option. Note: Your Android might carry a different name for "Cast," like Smart View, SmartShare, QuickConnect, Screen Casting, Wireless Display, or something else. Tap the three-dot menu icon in the top-right corner and toggle the option for "Enable Wireless display." Wait for your Amazon Fire TV to show up in the nearby devices list. Tap on the Fire TV's name when it shows up on Android. The text "Connected" will appear under your Fire TV's name. Your Android device's screen will appear in portrait mode if the orientation lock is enabled. Open the Quick Settings menu and look for the orientation lock option, which is sometimes titled "Auto-rotate." If it's enabled, tap the button to disable it. That's it! Now play your favorite shows or app on your Android device, and they'll show up on the TV set thanks to the Fire TV. In the future, you can use the "Cast" button in the Quick Settings menu to quickly connect your Android to the Amazon Fire TV. Have fun! RELATED: How to Tweak and Rearrange Android's Quick Settings Dropdown Please note: your TV and Apple device must be connected to the same Wi-Fi network Viewing photos and videos via AirPlay 2 Find the photo or video you wish to share 3 Tap the share icon in the bottom left of the screen 5 Tap the TV you wish to connect to 6 If prompted, enter the code shown on the TV on your Apple device Playing audio via AirPlay 1 Open the music player on your Apple device 4 Tap the TV you wish to connect to 5 If prompted, enter the code shown on your TV on your Apple device 3 Select Apple AirPlay settings Step 1: Connect. Launch Phone Mirror and connect your Android phone to PC. Step 2: Enable USB Debugging. Follow instructions to enable USB debugging on your phone. Step 3: Start Mirroring. Now you can control and use your Android phone from PC.
